SUPERVISORY PATENT EXAMINER

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is a method of diagnosing a Alzheimer's Disease comprising a detectably-labeled compound, such as fluorescent dye that preferentially binds to an amyloid protein located in an ocular tissue. While such fluorescent dye compounds are known in the art for diagnosis and treatment of patients having diseases associated with an accumulation of neuritic plaques, there is no teaching in the prior art that provides the requisite motivation to diagnose Alzheimer Disease by contacting ocular tissue with detectably-labeled compounds recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
